South Asia Archive

South Asia Archive is an archive, consultancy, and ongoing research initiative that uncovers and examines a neglected history of contemporary South Asian — one shaped by alternative visual cultures, sartorial politics, global dialogue, and counter-narratives of the subcontinent and its diaspora. Through programming, collaborative projects, and preservation of overlooked materials, the archive functions as both a reference point and a generative platform for a diverse network of artists, researchers and thinkers seeking to engage with and expand this history.

Through its ongoing library program, South Asia Archive facilitates temporary installations that function as both social nexus and open access research. These installations encourage audiences to engage with printed matter and reflect on the integral role of libraries and material culture in creative practice. For this edition of South Asia Archive's library program, collaborating artists are invited to activate the archive with contributions from their own personal collections.
